Test User Training Work Group of the Joint Committee on Testing Practices, 101–102
Theory: applied focus of, 166–167, 169–170; definition of, 160–161; good, 169; importance of, 165; many definitions of, 165, 168; research-practice-development-theory cycle and, 164; roles of, 163, 166. *See also* Theory-building research paradigms
Theory building, in HRD: applied focus of, 166–167, 169–170; appropriate methods debate and, 165; attention to, 163; challenges for, 168–175; common understanding and, 168; core knowns, 165–167; current state of, 169; dealing with researcher-practitioner relationship and, 168–170; definitions of theory and, 165, 168; desired state of, 169; different paradigms and, 165–166; importance of, 159, 162–165; important next steps for, 175; introduction to, 160–165; key research paradigms affecting, 171–175; key shifts needed in, 169; knowledge base and, 161; methods for, 166–167; multiparadigm methods and, 167–168; multiparadigm view and, 164; multiple research methods and, 164–165; multiple theory-building research and, 170–175; philosophical framework and, 167; positivist paradigm and, 164, 170; product and, 161; professional maturity and, 162–163; research and, 161–162; research-practice tension and, 163–164; research-practice-development-theory cycle and, 164; roles of, 163, 166; terms/concepts and, 160–162; theory and, 160–161, 163; theory-practice tension and, 163–164, 166; unknowns and, 167–168
"Theory Building in the Human Resource Development Profession," 159–178
Theory-building research paradigms: fields of, 160, 170; functionalist, 171–174; HRD and, 171–175; interpretivist, 171–174; multiparadigm, 164, 167–168, 170–175; positivist, 164, 170; radical humanist, 171–174; radical structuralist, 171–174
360 degree feedback, 285–287, 295
Three-Phase Model of Needs Assessment, 91
Torres, R. T., *Evaluative Inquiry for Learning in Organizations*, reviewed, 325–327
Training, participant reactions to (study): confirmatory factor analysis, 311–313; discussion/conclusions, 313–315; exploratory factor analysis, 308–311; future research, 315; instructional factor, 314; items/scales, 308; limitations, 315; method, 307–308; participants, 308; practitioner implications, 315; procedures, 307; questionnaire development, 307; relationship among factors, 313; research/practice implications, 314; results, 308–313; summary, 315–316; utility factor, 314. *See also* Participant reactions, to training
Training/development: costs of, 333–334; cross-cultural, 216; curiosity and, 8; needs assessment and, 270; older work-

ers and, 75–76; organizational socialization and, 10. *See also* Cross-cultural training assessment (study); Expatriate development; Feedback, management training and (study); Learning transfer; Management training (MT); Managerial development; Participant reactions; Training, participant reactions to (study); Training effectiveness; Training evaluation
Training effectiveness: learning and, 305; models of, 302; reactions to training and, 302, 333; research on, 304. *See also* Learning transfer
Training evaluation: levels of, 301–302; participant reactions and, 301; research on, 304–305
